Professional Experience

UX Designer, Design System at Indeed.com / May 2022 - Present | Full-time, Austin, Texas

- Contributing to both the main Indeed Design System and the Email Design System, creating over 20 components ranging from simple icons to complex elements like tables.
- Refactoring the entire Email Design System that includes over 30 components, elevating its quality score from 62/100 to 95/100.
- Crafting over 20 components adhering to localization, accessibility, and content best practices, resulting in a 15% decrease in localization errors and a 30% increase in accessibility compliance.
- Implementing design system engagement strategies such as training material and process optimization to serve over 500 UX product members.

Product Designer at Fast Radius / May 2021 - May 2022 | Full-time, Chicago, Illinois

- Designed the Manufacturing Execution System (MES), a desktop platform for monitoring over five 3D printing methods and used by over 30 internal technicians.
- Implemented improvements to the printing process, resulting in a 20% reduction in failure rates and a 15% increase in printing efficiency for technicians.
- Achieved a cost reduction of 25% associated with failures and losses in the 3D printing process.

UX Designer at Platform Science / Jun 2018 - Feb 2020 | Full-time, San Diego, California

- Created a design system based on Material Design, Android Auto, and Atomic Design, introducing 30 new components for both design and development teams.
- Reduced the product design workflow by 30%, resulting in cost savings and a 20% improvement in work efficiency.
- Provided additional expertise in front-end (HTML, CSS & JS), motion graphics, and CMS website management, enhancing the overall quality and versatility of deliverables.

UX Designer at Transport Systems / Oct 2017 - Apr 2018 | Full-time, Bogotá, Colombia

- Created the marketing website for Deodata, artificial intelligence transportation software, which contributed to the majority of the company's profits.
- Supported other products with UX design, collaborating closely with developers for efficient hand-off and planning processes.

Web Designer at BlueCaribu / Feb 2017 - May 2017 | Full-time, Bogotá, Colombia

- Designed and developed approximately 30 landing pages and 10 web platforms, in addition to creating remarketing banners for multiple clients.
- Achieved a 20% increase in click-through rates and a 15% improvement in conversion rates across campaigns due to optimized landing pages and web platforms.

Skills

- Adaptability
- Leadership
- Mentorship
- Component design
- Visual design
- Version control
- Documentation
- Collaboration
- Research and analysis
- Accessibility
- Agile methodologies

Core Tools

UX Design

- Figma
- Zeroheight
- Storybook
- Useberry

Project management

- Slack
- Jira
- FigJam
- Miro
- Confluence
- Notion
- Google Workspace
